SUMMARY

Software Developer with a Bachelor's degree in **Software Engineering** and a solid background in **software development**, **algorithms**, and **data structures**. Skilled at designing, implementing, and maintaining **high-quality applications** with an emphasis on **performance**, **scalability**, and **maintainability**. Strong analytical and **problem-solving** abilities, combined with a passion for learning new technologies and continuously improving engineering practices. Adaptable to evolving business needs and committed to delivering **reliable**, **efficient**, and **well-tested software** in collaborative development environments.

EDUCATION

Software Engineer, University of Information Technology - VNUHCM

GPA: **8.0/10**

[\(Link to transcript\)](#)

Relevant Courses: Object-Oriented Programming, Algorithms, Software Architecture, Operating Systems, Software Testing, Database Systems, Design Patterns, etc...

SKILLS

Technical Skills	Languages: C++, C#, Java, Python
	Game Development: Unreal Engine 5, Unity, OpenGL, SDL2, ImGui, JBox2D
	Frontend: Angular, React, TypeScript, HTML, CSS, JavaScript
	Backend: .NET, SQL Server
	Version Control: Perforce, GitHub
Soft Skills	Strong communication, presentation, and teamwork skills.
Other Skills	English (TOEIC: 665).

EXPERIENCE

Unreal Engine Developer Away Digital Home	September 2024 – Present <i>HCMC, Vietnam</i>
---	--

- Developed interactive architectural visualization applications for clients in the U.S. and Australia using Unreal Engine 5, delivering immersive real-time experiences.
- Owned the Unreal Engine implementation, including interactive features, house visualization logic, and internal tools that streamlined scene setup and configuration.
- Collaborated closely with 3D artists and developers to integrate assets, optimize workflows, and deliver high-quality client demonstrations.
- [awaydigitalhome.com](#)

Junior Unreal Engine Game Developer World@Meta	July 2023 – March 2024 <i>HCMC, Vietnam</i>
--	--

- Developed features for a Metaverse-based online learning platform using Unreal Engine 5, supporting teaching centers and universities.
- Contributed throughout the software development lifecycle, from early development to feature implementation, in an international engineering team.
- Collaborated with engineers and stakeholders across multiple countries to deliver product features and resolve technical challenges.

EDUCATION / PERSONAL PROJECTS

NiceEngine. ([GitHub](#)) ([Demo](#))

April 2022 – July 2023

- Designed and developed a 2D game engine inspired by Unity, Cocos2d, and Hazel using Java, OpenGL, JBox2D, and ImGui.
- Implemented an **Entity Component System (ECS)** architecture along with the rendering pipeline, physics integration, scene management, and an editor interface.
- Participated in the complete software development lifecycle, including system design, implementation, testing, and project management.
- Developed as my undergraduate capstone project.

Tanks. ([GitHub](#))

October 2022 – October 2023

- Developed a 2D tank shooting game using Unity.
- Applied software design patterns and Unity technologies including UniTask, Object Pooling, NavMesh, Observer Pattern, and Scriptable Objects.
- Implemented multiple weapon systems, enemy AI behaviors, and visual effects to enhance gameplay.

SoccerTime. ([GitHub](#))

October 2020 – February 2021

- Developed a desktop application for football tournament management using C#, WinForms, WPF, MVVM, and SQL Server.
- Implemented backend logic for tournament scheduling, data management, and persistent storage.

SimpleTank2D. ([GitHub](#))

May 2022 – July 2022

- Built a classic 2D tank shooting game using core Java.
- Implemented game mechanics including movement, collision detection, enemy AI, and game state management.

AWARDS

- Consolation Prize – Vietnam Olympiad in Informatics (National Programming Competition), 2019
- Silver Medal – Olympic 30/4 Programming Competition, 2019
- 3rd prize in the "Wolffun Best Developer" contest organized by Wolffun Game company in 2022.
- Away's Certificate of Engagement Star 2025

EXTRA-CURRICULAR ACTIVITIES

- Learning on Udemy, Coursera and other E-learning platforms.
- Participate in algorithm, hackathon competitions and codeforce contest (*Check out my Codeforce profile below*).
- Play football, badminton, billard, etc...

CERTIFICATES & PROFILES

- [C++ Programming for Unreal Engine Game Development](#) – University of Colorado (Coursera)
- [Complete C# Unity Game Developer 3D](#) – Gamedev.tv (Udemy)
- [C# Programming for Unity Game Development](#) – University of Colorado (Coursera)
- [Codeforces \(Expert\)](#)
- [LeetCode](#)
- [GeeksforGeeks](#)
